

| | |
|-------------------------|---------------------------------------|
| Model | Jeriko |
| Sole | Jeriko Sole |
| ISO | EN ISO 20345:2011 |
| Article | 294-02 Gray |
| Protection | S2/S3 |
| Line | JERIKO |
| Upper | Full Grain Leather |
| Lining | 3D Air-Lining |
| Removable Insole | Soft-Walk |
| Sole | PU/PU Dual-Density SRC passed |
| Toe Cap | Steel toe cap |
| Midsole | Multi Protection anti- perforation |
| Size | 36-47 |

Protection Elements

Multi Protective FLEXIBLE

This regulation states that the tip of the nail must not perforate the insole under a force of 1100N. Soft and flexible, it increases comfort and sensitivity, ensuring greater movement control and less strain. The possibility to use it as a "strobe stitched" insole increases the protection surface by 100% Excellent thermal insulation and not detected by the metal detector.

STC STEEL TOE CAP

It is resistant to an impact force of over 200J, requested by the standard, and is capable of immediately regaining its original shape without trapping the foot in the case of a very strong impact.

Working Environments

Food and Chemical Industry - Light Industry Worker - Metal - Otomotive - Oil Industry - Iron and Steel - Construction - Logistic - Engineering

Footbed

Soft-Walk

Soft Walk system, in direct contact with the foot, guarantees transpiration and comfort. Air circulation through the porous structure of PU, with large holes in the area where the heel sits, supports the heel correctly. By compressing and expanding, it lets out the moist air, away from the foot, generating a flow of air inside the footwear.
